

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A ~~pharmaceutical composition of a didemnin compound, kit~~ comprising ~~firstly~~ a lyophilized didemnin preparation including water-soluble material and ~~secondly~~ a reconstitution solution of mixed solvents.
2. (Currently Amended) A ~~didemnin composition~~ kit according to claim 1, ~~intended for wherein the kit comprises an amount of the lyophilized didemnin preparation reconstitution for administration to patients as an antitumor treatment~~ that is suitable for the treatment of a tumor in a patient.
3. (Currently Amended) A ~~didemnin composition~~ kit according to claim 1 ~~or 2~~, wherein the didemnin is chosen from didemnins, dehydrodidemnins, nordidemnins, didemnin congeners and didemnin analogs.
4. (Currently Amended) A ~~didemnin composition~~ kit according to claim 3, wherein the didemnin ~~compound~~ is aplidine.
5. (Currently Amended) A ~~didemnin composition~~ kit according to any of the preceding ~~claim~~ claims, wherein the reconstitution solution comprises an alkanol/water mix.
6. (Currently Amended) A ~~didemnin composition~~ kit according to claim 5, wherein the reconstitution solution ~~includes~~ further comprises a nonionic surfactant.

7. (Currently Amended) A ~~didemnin composition~~ kit according to claim 6, wherein the nonionic surfactant is 10 to 25% v/v of the solution; the alkanol is ethanol and is 10 to 25% v/v of the solution; and the water is 50 to 80% v/v of the solution.
8. (Currently Amended) A ~~didemnin composition~~ kit according to ~~any preceding~~ claim 1, which comprises a vial of lyophilized didemnin preparation including a water-soluble bulking agent, and a separate vial of a premix of non-ionic surfactant/ethanol/water.
9. (Withdrawn) A method of preparing a pharmaceutical composition of a didemnin compound, which comprises freeze drying a didemnin/water-soluble additive/alkanol/water mix to provide a lyophilized first component, and separately providing an alkanol/water mix as reconstitution solution.
10. (Withdrawn) A method according to claim 9 wherein the alkanol in the mix is t-butanol.
11. (Withdrawn) A method according to claim 9 or 10 wherein the amount of alkanol in the alkanol/water mix is 25 to 60% v/v.
12. (New) A reconstituted pharmaceutical composition comprising:
  - a didemnin compound;
  - a water soluble material;
  - a surfactant;
  - an alkanol; and
  - water.
13. (New) The pharmaceutical composition of claim 12, wherein the water soluble material is a water soluble bulking agent.

14. (New) The pharmaceutical composition of claim 13, wherein the water soluble water soluble bulking agent is mannitol.
15. (New) The pharmaceutical composition of claim 12, wherein the didemninn compound is selected from the group consisting of a didemninn, a dehydrodidemninn, a nordidemnn, a didemninn congener or a didemninn analog.
16. (New) The pharmaceutical composition of claim 15, where in the didemninn compound is aplidine.
17. (New) The pharmaceutical composition of claim 12, wherein the surfactant is a nonionic surfactant.
18. (New) The pharmaceutical composition of claim 17, wherein the nonionic surfactant is Cremophor EL.
19. (New) The pharmaceutical composition of claim 12, wherein the alkanol is ethanol.
20. (New) The pharmaceutical composition of claim 12, wherein the composition is prepared by the steps comprising:
  - (i) freeze drying a first solution comprising the didemninn compound, the water-soluble material and an alkanol/water mix to provide a lyophilized didemninn preparation; and
  - (ii) reconstituting the lyophilized didemninn preparation with a nonionic surfactant/alkanol/water mix to form a second solution.
21. (New) The pharmaceutical composition of claim 12, wherein the alkanol/water mix comprises *t*-butanol.

22. (New) The pharmaceutical composition of claim 21, wherein the alkanol/water mix comprises 25 to 60% v/v *t*-butanol.
23. (New) The pharmaceutical composition of claim 20, wherein the nonionic surfactant is 10 to 25% v/v of the nonionic surfactant/alkanol/water mix; the alkanol is ethanol and is 10 to 25% v/v of the nonionic surfactant/alkanol/water mix; and the water is 50 to 80% v/v of the nonionic surfactant/alkanol/water mix.
24. (New) A lyophilized didemnin preparation prepared by freeze drying a solution comprising a didemnin compound, a water-soluble material and an alkanol/water mix.
25. (New) A pharmaceutical composition prepared by reconstituting the lyophilized didemnin preparation of claim 24 with a nonionic surfactant/alkanol/water mix.
